Axxess II

Aircell Axxess II Iridium Satcom system

Based on your satellite communication usage, you will be able to build your own configuration using the different options offered by Dassault Aviation to provide you with a simple system with more voice channels and cockpit data functions.

Axxess II Satcom system is being certified by Dassault Aviation to be FANS 1A+ compliant before the end of 2013.

Axxess II Satcom system is the Aircell evolution of ST-3100 Satcom system. Replacement can be performed in Dassault Falcon Service through Dassault Aviation Modifications for competitive budget and ground-time.

Applicability

Falcon 900 / EX / EX EASy
Falcon 2000 / EX / EX EASy
