

Winglets Retrofit

Designed in cooperation between Aviation Partners, Inc. and Dassault Aviation, the winglets technology helps boost performance and fuel savings for the Falcon 2000 and Falcon 900 families

What the winglets retrofit brings:

- Winglets installation for increased efficiency
- Primary Structure Warranty continuation (if applicable)
- Installation with Dassault OEM tooling
- Interchangeability of modified components supported by Worldwide Spares
- EASA approval through API STC

Winglets Retrofit

Upgrade your Falcon with High-Mach Blended Winglets by API

The winglets and winglets installation kit are purchased by the operator directly from API.

The winglets and associated components will be installed per OEM approved data.

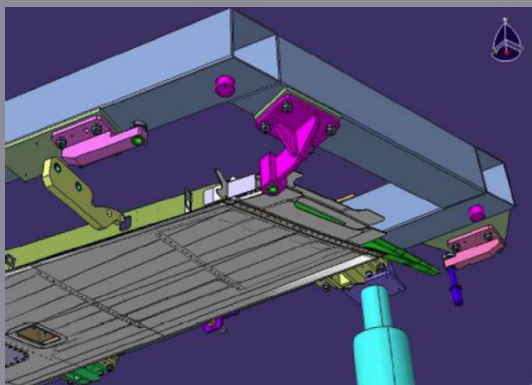

The result is an aircraft with increased range (5% increase for operators cruising at Mach .80 and over 7% at LRC).

Applicability

Falcon 900 / EX / EASy
Falcon 2000 / EX

Schedule

Provisioning & studies: 4 weeks
Duration of works: 5 weeks
